Introducing the Basics

This introduction to WestlawNext® shows you how to use the home page, browse documents in a search result, use filters to narrow a search result, print documents, check citations in KeyCite®, and organize your research using folders.

Using the Home Page

At the home page (Figure 1), you can use the search box at the top of the page to search for documents or to retrieve documents by citation or name. You can also access services and browse content using the links in the Browse section.

Retrieving Documents by Citation or Name

To retrieve documents by citation or name, do one of the following:

- To retrieve a document by citation, type find: or fi: followed by the citation, for example, type fi: 127 sct 2162, in the search box and click Search.

- To retrieve multiple documents by citation, type find: or fi: followed by the citations in the text box and click Search. Separate each citation with a semicolon, for example, type fi: 127 sct 2162; 42 usca 2000e-5.

You can also use the title field (ti) to retrieve a case by party name, for example, type ti(rumsfeld & hamdan). If you use the title field, you will retrieve only those cases in which both Rumsfeld and Hamdan appear in the title of the case.
